1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 4,5,6 and 19, drawn to a pivotable power tool, classified in class 30, subclass 376.
  - II. Claims 7-9,20,21 and 26, drawn to a tool using a printed circuit board motor, classified in class 310.
  - III. Claims 10-12 and 22, drawn to a tool having an adjustable exhaust duct, classified in class 83, subclass 100.
  - IV. Claims 13-15 and 23, drawn to a tool having an adjustable extension plate, classified in class 30, subclass 289.

Claims 1-3, 16-18, 24 and 25 are in no group and will be examined with the elected invention.

2. Claims 1 and 16 link the inventions of groups I-IV. The restriction requirement of the linked inventions is subject to the nonallowance of the linking claims 1 and 16. Upon the allowance of the linking claims, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending from or otherwise including all the limitations of the allowable linking claims will be entitled to examination in the instant application. Applicants are advised that if any such claims depending from or including all the limitations of the allowable linking claims is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the

claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions of groups I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the tool having an adjustable duct of group III could be used without the extension plate of group IV, and conversely, the tool having an extension plate as in group IV could employ a fixed exhaust duct, rather than the adjustable duct of group III. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ken Peterson whose telephone number is 703-308-2186. The examiner can normally be reached on Monday thru Thursday between 7am and 4pm. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 703-308-1082.

In lieu of mailing, it is encouraged that all formal responses be faxed to 703-872-9302. Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist whose telephone number is 703-308-1148.
